Viktor Karasev

Back-end developer

About Me

Hello! I'm Viktor Karasev. I am passionate about Functional programming and Back-end development. I do not have much experience, but I am open to everything new and ready to work actively. I am a quick learner and a team worker that gets the job done.

Bio

📅	**Age**	19
✉️	**Email**	karasssdev@gmail.com
📞	**Phone**	+7-965-035-85-17
📍	**Address**	St Petersburg, Russia

Professional Skills

Kotlin/Spring/TornadoFX

Education

○ **Bachelor of Software Engineering** from St Petersburg University

2020 - Present

Software engineers apply engineering principles and knowledge of programming languages to build software solutions for end users.

○ **Functional programming on Haskell** from Computer Science Center

2021

Haskell has pioneered a number of programming language features such as type classes, which enable type-safe operator overloading.

○ **Algorithms: theory and practice** from Computer Science Center

2020

Algorithms are used in almost all areas of computer science - in image analysis, in Internet search, in machine learning, in bioinformatics, in cryptography, in coding, in networks, in distributed systems, in compilers.
